OBJECTIVE

Results-driven Computer Science fresher with a B.Voc in Information Technology and strong hands-on experience across web, Android, and Python development. Proficient in full-stack development, data structures, and algorithmic problem-solving. Adept at writing clean, scalable code across multiple languages. Eager to contribute to impactful engineering projects at a forward-thinking technology company.

EDUCATION

Maa Shakumbhari University (MSU)

Saharanpur, Uttar Pradesh

Bachelor of Vocation (B.Voc) — Information Technology

July 2022 – July 2025

- **Relevant Coursework:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Web Technologies, Mobile App Development, Python Programming

PROJECTS

Online Mobile Shop | PHP, JavaScript, HTML5, CSS3, MySQL, Python

2024

- Built a full-stack e-commerce web application enabling users to browse, search, filter, and purchase mobile phones
- Engineered RESTful backend in PHP with MySQL; wrote optimized SQL queries reducing average page-load data fetch by 40%
- Developed user authentication (register/login/session), product catalog, shopping cart, and order management modules
- Used Python scripts for automated product data processing, inventory report generation, and database seeding
- Implemented responsive, cross-browser-compatible front-end using HTML5, CSS3, and vanilla JavaScript

C Tutorial — Android Application | Java, Android SDK, XML, Android Studio

2024

- Designed and deployed an Android mobile app delivering structured, interactive C programming tutorials for beginners
- Architected multi-screen navigation with Android Activities and Fragments following MVC design patterns
- Covered 30+ topic modules including syntax, data types, arrays, pointers, memory management, and file I/O
- Built intuitive, accessible UI with XML layouts adhering to Material Design guidelines; tested on Android API 26–34
- Integrated syntax-highlighted code snippets to improve comprehension and user engagement

Python Automation & Scripting | Python, File I/O, pandas, os/sys modules

2024

- Developed Python utility scripts for file management, CSV/data parsing, and batch processing tasks
- Applied core Python concepts: OOP, exception handling, list comprehensions, modules, and standard libraries

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, PHP, C, C++, HTML5, CSS3, SQL

Web Development: React.js, Bootstrap, REST APIs, Responsive Design, DOM Manipulation

Android: Android Studio, Android SDK, Java (Android), XML Layouts, Material Design

Databases: MySQL — Schema Design, Query Optimization, Joins, CRUD, Indexing

Python Libraries: pandas, os, sys, csv, json

Tools & Concepts: Git, GitHub, VS Code, Data Structures, Algorithms, OOP, SDLC, Debugging, Unit Testing

KEY COMPETENCIES

- Delivered 3 independent end-to-end projects spanning web, Android, and Python — demonstrating versatility across the stack
- Practiced clean-code principles: modularity, commenting, version control, and adherence to coding standards throughout all projects
- Consistently debugged, profiled, and improved application performance and user experience across all projects
- Proactively kept pace with emerging technologies, industry best practices, and modern development frameworks

SOFT SKILLS

Analytical Thinking | Problem Solving | Continuous Learning | Team Collaboration | Attention to Detail
| Adaptability
